

A FORMULA FOR LIFE

## TREVOR STONEY

White Wood Farm, Pateley Bridge, North Yorkshire

Trevor Stoney has a herd of 40 suckler cows, which are mainly spring calving. A small number do calve in the autumn as well.

Recently, there has been a decline in the amount of available colostrum from local dairies so sourcing a powdered alternative has become a necessity. Trevor now feeds Farmer's Choice Calf Colostrum to most of the calves. "It gives me peace of mind knowing that the calves get the colostrum they need for a good start.

"Since using Farmer's Choice Calf Colostrum the calves have not suffered at all from scour. I've experienced scour problems when I've used other powdered colostrum, so this is a first."

Trevor would recommend the Farmer's Choice Calf Colostrum to others: "It's so handy in the bottle, with no fuss. It's a brilliant product."
