

# TAKE CONTROL with **ICONIX** Electronic Weighing Systems

FAST ACCURATE RELIABLE COMPATIBLE

Accurate, regular weighing enables ICONIX farmers to manage growth rates, check slaughter weights and finish stock to contract, unlocking hidden profitability.

## TAKE CONTROL with **ICONIX** Electronic Weighing Systems

Optimising feed conversion rates and finishing stock to contract are vital to profitable livestock production. ICONIX Electronic Weighing Systems provide the information you need to manage stock performance and to check slaughter weights, putting you back in control of your business.

ICONIX is simple to use, rugged and durable. Designed for even the harshest environment, ICONIX Electronic Weighing Systems are the first choice for UK livestock farmers who demand regular and accurate weight management information.

Engineered for use with mobile and fixed handling systems, ICONIX can even be installed as part of an existing system. The system can be used with most makes or models of weigh crate or race.

## ICONIX FX1

850 070

### Simple, accurate electronic weighing

ICONIX FX1 offers electronic weighing on a budget. Simple to use – just switch it on and it's ready to go. More than just an entry level machine, ICONIX FX1 comes with two weighing modes for livestock and other weighing tasks, and Auto Zero function for accurate weighing time after time.

#### ICONIX FX1 features:

- Auto Zero and Auto Tracking functions
- Tough Polycarbonate weatherproof casing
- Heavy duty cables with amphenol connectors
- Compatible with the full range of Cox Agri/ICONIX loadbars

## ICONIX FX15

850 074

### Simple, accurate electronic weighing plus data storage and retrieval

ICONIX FX15 delivers simple, accurate electronic weighing coupled with effective herd/flock data storage and retrieval, providing easy access to essential data at any time during weighing. Record and review statistics including average weight, total weight and min/max weights at the touch of a button.

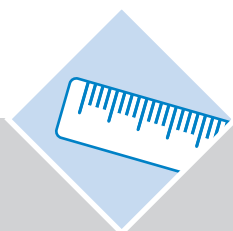

The ICONIX FX15 has a rugged polycarbonate casing for total protection and easy read digits for superb visibility in all conditions. It has an internal rechargeable battery and can be used with the mains lead provided or connected to a 12 volt supply.

#### ICONIX FX15 features:

- Easy access to essential data during weighing
- Rugged Polycarbonate Alloy for total protection
- Three flexible power options
- High visibility easy-read digits

### Accurate

Electronic weighing that is accurate to +/- 0.5% of display reading.

### Strong

Weighs up to 2000kg. (Up to 3000kg with ICONIX FX heavy duty loadbars.)

### Durable

Tough polycarbonate weatherproof case.

### Service

Two year warranty as standard. UK support, service and repair.

# ICONIX FX41

850 078

## The advanced electronic livestock weighing system from ICONIX

ICONIX FX41 puts you in total control, with access to weighing and drafting statistics during and after weighing, and impressive data storage, analysis and management features. The FX41 has the capability to automatically calculate weight gain and the capacity to handle two-digit condition codes and ID prefixing. ICONIX FX41 has an internal rechargeable battery and can be used with a mains lead (provided) or connected to a 12 volt supply.

### ICONIX FX41 features:

- **Advanced Electronic ID compatibility**
- **Dual displays**
- **Easy access to data post-weighing**
- **Three flexible power options**
- **Holds up to 6000 records in 99 groups**

Select the right **ICONIX Electronic Weighing System** for you

Weigher function	FX1	FX15	FX41

Two digit condition code storage facility			◆

◆ Standard ○ Optional

### Flexible

12v DC, battery and mains options available.

### Value

Competitively priced.

### Compatible

For use with fixed and mobile handling systems. Fits existing equipment.

### Auto reset

Auto Zero resets the scale to zero between weighing. Zero Tracking ensures small residual weights left on the scales, including dung and dirt, are automatically ignored.

# ICONIX Loadbars and Accessories

## High performance loadbars for accurate results

ICONIX FX Series Loadbars are tough, durable and accurate, and compatible with the FX1, FX15 and FX41 ICONIX Electronic Weighing Systems.

### ICONIX FX Series Standard Loadbar set

600mm 850 080

1000mm 850 082

ICONIX FX Series Standard Loadbars are made from tough rust-protected steel and designed for use under platforms, crates, crushes and wool-presses. They come with heavy duty cables as standard, sealed into the bars to eliminate moisture points. Shock absorbing rubber mounts protect the load cells and maintain weighing accuracy in even the toughest environments.

#### ICONIX FX Series Standard Loadbars

- Weigh up to 2000kg
- With heavy duty 6m cables as standard
- Available in 600mm and 1000mm length as standard (400mm length by special order)
- Tough and fully weatherproof

### ICONIX FX Series Heavy Duty Loadbar set

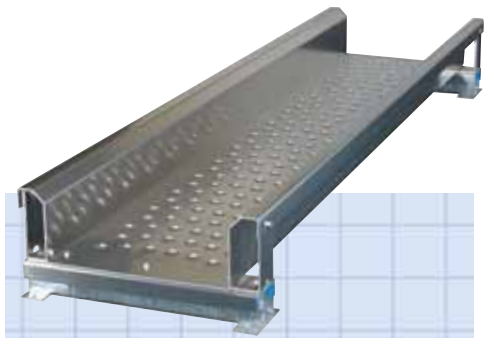

850 088

With all the benefits of the Standard Loadbar set and more, ICONIX FX Series Heavy Duty Loadbars are designed for use with even the largest and most energetic livestock.

#### ICONIX FX Series Heavy Duty Loadbars

- Weigh up to 3000kg
- Super tough, for use with even the largest, most energetic livestock
- With shock absorbing rubber mounts to protect load cells from the rigours of unsettled stock

#### Sided Cattle Platform

- 2400mm x 610mm x 230mm
- Lightweight, robust, aluminium platform
- Weighs just 29kg
- Compatible with 600mm loadbars 1000kg capacity

### WinFX Linker Package 850 106

#### Linking your PC and ICONIX FX41 for seamless data management

WinFX from ICONIX links your FX41 and PC, giving easy access to essential data. Now you can review, edit, interrogate and present individual animal and herd/flock data quickly and efficiently. WinFX comes complete with Windows-based software and a cable to link your FX41 and PC, so downloads could not be easier.

- Download new data to your PC quickly and efficiently
- Pre-load historic data to your FX41 for on-the-spot weight-gain analysis
- Set criteria for manual and automated drafting systems
- Review, edit, interrogate and present individual animal and herd/flock data
