DRENCHERS AND VACCINATORS

NJ PHILLIPS DRENCHERS
AN ACCURATE DOSE EVERY TIME

DRENCHERS

An accurate dose every time. Phillips precision products have administered over 30 billion accurate doses to animals across the world. Highly accurate - no wastage.

Designed and manufactured in Australia, Phillips products are built of the highest quality materials to withstand everything that farming conditions can throw at them.

The Phillips range gives reliable trouble-free operation in even the harshest conditions and has been trusted for generations by farmers worldwide.

20ML AUTO DRENCHER

One of the most popular and accurate drenchers in the world. Precision engineered metal construction. In-line testing during manufacture ensures the very best quality. Dosages easily adjusted in seconds, for economic and efficient use of drench.

- Quick fill for speedy operation
- Anti-spin nozzle
- Comfort grip
- Rear inlet valves for cleaning
- Suitable conversion to pour-on
- 1ml graduations

20ml Auto Drencher complete with Feed Tube 441 053
20ml Auto Drencher complete with 2.5 L Container and Harness 441 004

Pour-on Nozzle (not illustrated) 572 822
Major Spares Kit 576 750
NJ PHILLIPS VACCINATORS

REPEATER VACCINATORS

Phillips Repeater, easy to use, hassle free Phillips injectors. Fill direct from the bottle, set the dose and start injecting. When injecting ewes and lambs the dose is altered easily with a simple twist of the regulator.

- No trailing tubes or awkward, breakable bottles
- Inject at any angle
- Single hand operation in use
- Dial-a-dose setting, can be altered at any time
- Mechanism tested to 100,000+ injections by NJ Phillips
- Particularly useful for larger doses from small bottles
- Works well with all consistencies of medication, thick, thin and oily
- Less wastage, draw only the required dose from the bottle
- Easy to clean, no valves or springs to lose
- Accepts disposable and reusable luer lock needles
- Spare needle holder/magazine in the handle
- Perfect for super fine liquid medications such as Iron injections for pigs
- Supplied with needle spanner

25ml Repeater Vaccinator
Doses up to 2.5ml in 0.5ml increments.  529 175

50ml Repeater Vaccinator
Doses up to 5ml in 1ml increments.  529 606

DRENCHERS AND VACCINATORS

5ml EZI-GRIP VACCINATOR
Clear dose selection, easy to clean, comfortable to use. Lightweight ergonomic design with variable dose. Suitable for cattle, sheep and pigs.
Ezi-Grip vaccinators are constructed from high quality materials and built to last. The bottle attachment draws vaccine from a bottle or flexible pack. Luer lock needle fitting avoids accidental dislodging. Can be sterilised without dismantling.

Ezi-Grip 5ml with Bottle Attachment

2ml AUTO VACCINATOR
Phillips 2ml Auto Vaccinator, metal construction is designed to last, a precision instrument that is fully serviceable.
Proven design, tested and trusted to give accurate vaccinations for years. Suitable for iron injection.
Calibration range 0.5ml to 2ml

2ml Auto Vaccinator

5ml AUTO VACCINATOR
Robust metal construction which is designed to last. Phillips 5ml Vaccinator only requires a gentle squeezing action to administer dose. Luer lock to secure needle.
Calibration 0.5ml to 5ml

5ml Auto Vaccinator

5ml SEMI-DISPOSABLE VACCINATOR
One of the most popular plastic vaccinators in the UK. High quality precision Phillips vaccinator.
Lightweight and economic automatic vaccinator, giving accurate administration of vaccine. Complete with draw off system.

5ml Semi-Disposable Vaccinator
**EZI-GRIP 12.5ml DRENCHER/VACCINATOR**

Easy to clean, comfortable to use.
Easy and clear dose selection.
Lightweight ergonomic design with variable dose rates and interchangeable nozzle assemblies.
Suitable for cattle, sheep and pigs.
0.5ml graduations

**Ezi-Grip 12.5ml Drencher/Vaccinator** 532 420

**Major Spares Kit**
(not illustrated) 576 680

---

**12.5ml AUTO DRENCHER/VACCINATOR**

A versatile instrument, suitable for low volume drenching of sheep and injection of cattle and other large animals. Simple to use. Durable plastic and fully serviceable, providing accurate and reliable dosing.
1ml graduations (1ml - 12.5ml)

**12.5ml Auto Drencher/Vaccinator** 440 097

**Minor Spares Kit**
(not illustrated) 576 578

**Major Spares Kit**
(not illustrated) 570 600

---

**25ml AUTO DRENCHER**

Economic, lightweight drencher made from high quality plastic for oral dosing of sheep and goats.
Compatible with most drenches.
2.5ml graduations

**25ml Auto Drencher** 439 046

---

**30ml AUTO DRENCHER**

Don’t waste a drop of drench. Manufactured from high grade plastic for a robust construction - this drencher is virtually unbreakable.
Bite resistant metal nozzle, adjustable for comfortable drenching.
For administering oral animal health products to a variety of livestock.
Removable cylinder makes cleaning and servicing easy. 2.5ml graduations

**30ml Auto Drencher complete with Feed Tube** 440 048

**Major Spares Kit**
(not illustrated) 576 626
DRENCHERS AND VACCINATORS

**60ml AUTO CATTLE DRENCHER**

Gives an accurate dose every time with the minimum of fuss. High grade plastic construction - this drencher is virtually unbreakable. Bite resistant metal nozzle, adjustable for comfortable drenching. Easy to adjust, clean and maintain.

2.5ml graduations

STERIMATIC
A UNIQUE SYSTEM WHICH PROTECTS NEEDLES

The safer, hygienic and economical way to inject all livestock. Helps protect livestock against cross infection from damaging viruses and bacteria. Laboratory tested and used extensively across the world, the Sterimatic System has proved to be effective on a wide range of animals, poultry and birds.

The Sterivax Pack combines a high quality 5ml Phillips vaccinator with the Sterimatic Needle System, to give up to 300 automatically disinfected and accurate injections. The Sterimatic sleeve is a retractable sleeve which fits onto the syringe around the needle, helping to protect it.

The Stericap is a precision moulded plastic container, that fits into the Sterimatic sleeve and contains foam soaked in disinfectant, which cleans the needle as it passes through the Stericap. The needle is protected before use and automatically cleaned as it enters the animal.

Benefits of the Sterimatic System:
- Increased safety for the operator, fewer needle stick and scratch injuries
- Healthier livestock as a result of reduced abscesses and cross infections between animals

STERICAP delivers total protection, automatically drawing the needle through a biocide-filled chamber between every injection.

Sterivax Pack comprises:
Phillips 5ml semi-disposable vaccinator.
Draw off system
1 Sterimatic sleeve
3 Stericaps
3 18g x 1” needles

Cox Sml Sterivax Pack 530 311

Refill Packs
5 needles and 5 Stericaps 530 190
Short Sleeve (not illustrated) 530 232

It’s so easy to use:
Prime the needle and syringe to expel air, as usual.
Fit the protective sleeve over the needle and onto the syringe.
Push the STERICAP onto the sleeve over the needle point.
Twist off the seal and discard and the system is ready for use.
Push the STERICAP against the skin of the animal, the sleeve will retract.
The needle passes through the STERICAP chamber and is automatically swabbed and disinfected. The dose is delivered to the correct depth, as usual.
As it is withdrawn, the sleeve retracts and needle passes back through the chamber where it is swabbed and disinfected again, ready for reuse.
DRENCHERS AND VACCINATORS

NEEDLES AND SYRINGES

Sterile Disposable Syringes
Omnifix. Manufactured by Braun.
3 piece syringes individually packaged, pad printed, highly transparent barrel, high-contrast black marking. Latex free. Luer lock fittings. Packs of 100.
